Notes/Comments:

Refer all other abnormal cervical screening test results to colposcopy. Please refer to an individual colposcopist's office. You do not need this referral form.

Screening with cytology:

- A low-grade cytology result (ASCUS or LSIL) followed by another low-grade cytology result (ASCUS or LSIL) at the 12 month: repeat cytology test.
- A low-grade cytology result (ASCUS or LSIL) followed by a normal cytology result (NILM) at the 12 month: repeat cytology test, and then followed by a low-grade cytology result (ASCUS or LSIL) at the second 12 month: repeat cytology test.
